## Living with the cuts: Policy, politics and everyday lives in the recession

Friday 30<sup>th</sup> May 2014, 9.30-17.30, British Library, 96 Euston Road, London NW1 2DB

A day conference organised by the University of East London (UEL), Centre for Narrative Research (CNR) at UEL, & NOVELLA (Narratives of Everyday Lives and Linked Approaches) Research Methods Node at the Institute of Education, with the Tavistock Centre.

Many people in the UK are now living with the impact of recession and public spending cuts in their daily lives; larger effects are still to come. Government and policy-makers predict that cuts will continue till the end of the decade, yet these measures' usefulness and necessity are much debated. This day conference brings together academics, policymakers, practitioners, and community researchers, to discuss the issues and levels of analysis that need to be taken into account when studying the cuts, and to explore the human effects and socio-political significance of living in recession.
