97.5%

WHAT DO YOU FEEL IS THE BEST PART OF YOUR APPRENTICESHIP?

Our tutors encourage problem-solving and how to be adaptable. I think this is excellent and encourages us to explore what approaches work for us. They also encourage us to reason our decisions which makes us more confident in ourselves and builds a more practical understanding of how to apply theory.

The support and guidance provided by my Coach, lecturers and Course Leader; there is a tangible feeling that they care about my progress and that is appreciated.

Collaborating with apprentices from other companies which helps strengthen teamwork, exposure to understanding how other companies work and the work that the other apprentices do, make new friends, and learn from each other.

The fact that we are mixing teaching with practice. The material that we studied and practiced at UEL was applied on the job. Everything is making sense why we practice the way we practice.

The lecturers at UEL come from a range of backgrounds and demonstrate current knowledge of the issues we experience as apprentices in the real life workplace.

The lecturers are understanding of our role as apprentices and value our experience and encourage us to share our workplace experiences.

The support I have received from my lecturers. They were approachable and always able to answer questions. I felt supported during difficult times in my personal life.
